

## **The policy of KH-KIPPER Sp. z o. o. on responsible supply chain (Conflict Minerals)**

The KH-KIPPER company declares that all purchased raw materials and materials come from responsible sources. We are against the use of minerals from zones of armed conflict, and materials of dubious or unknown origin. For this purpose, we obtain information about their origin from our suppliers.

We expect all our suppliers to follow the principles of corporate social responsibility in sourcing raw materials and materials for their operations, and that they will implement safe sourcing policies and require their suppliers to do the same.

In the event that KH-KIPPER receives information that a given supplier does not meet these expectations, we will take appropriate actions to resolve this situation or we will terminate cooperation with this supplier.
