LIGHT MINING & CONSTRUCTION TIPPING BODY IN ONE

APPLICATION VERSATILITY

Classic square WICES body is a universal body designed for operation in different locations in the extremely difficult climate conditions. Any place where a simple and, at the same time, strong and reliable equipment with an efficient body heating system is needed (in option).

The bodies work well in both construction and light mining transport – they carry sand, gravel, smaller fraction stones and asphalt.

The new design of the body is a combination of the customers' needs and experience which KH-KIPPER has gained on different markets with square tippers.

DESIGN OPTIMALIZATION

Due to the optimalization of the body's cross section, the design involves a lower loading height. Optimal position of the center of gravity allows for a better stability during unloading and transport – especially in difficult terrain conditions.

LOWER WEIGHT

Lowering of the body's own weight increases its load capacity. The driver can transport more material in the same period of time

GREATER RESISTANCE

Greater resistance to damage is ensured by the appropriate shape of the body and subframe. Profiled corners prevent the load from adhering. The mechanical properties of high-quality HARDOX steel, of which the floor and sidewalls are made, ensure effective protection against damage.

LONGER LIFETIME

Profiles reinforcing the side boards stiffen the construction of the body and give it an adequate strength.

EXCAVATORS &
WHEEL LOADERS
WITH BUCKETS

≤ 5 m³

PAYLOAD

SAND, GRAVEL,
SOIL, LOOSE EARTH

FLOOR WIDTH
(POSSIBILITY OF TRANSPORTING ADDITIONAL
EQUIPMENT, E.G. SPREADER)

TECHNICAL DATA

payload	35 t
volume	21 m ³
width external	2.5 m
steel	HARDOX 450
floor	8 mm
sides with reinforcement ribs	5 mm

hydraulic system	HYVA
stability control system - HYVA DTS Guide	in option
floor heating system	in option
stone ejectors on rear bogie	in option
battery / fuel tank / air tank / AdBlue protection	in option

INTELLIGENT
BLIND SPOT
DETECTION
(IN OPTION)
